At M/N ≈ 0.35, does erasing spatial history reset the clock?

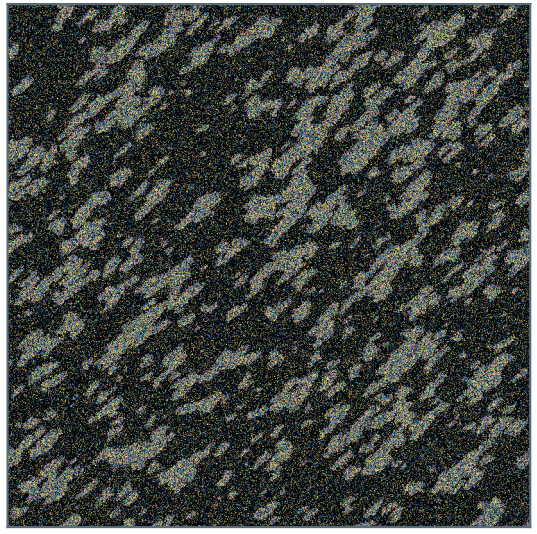

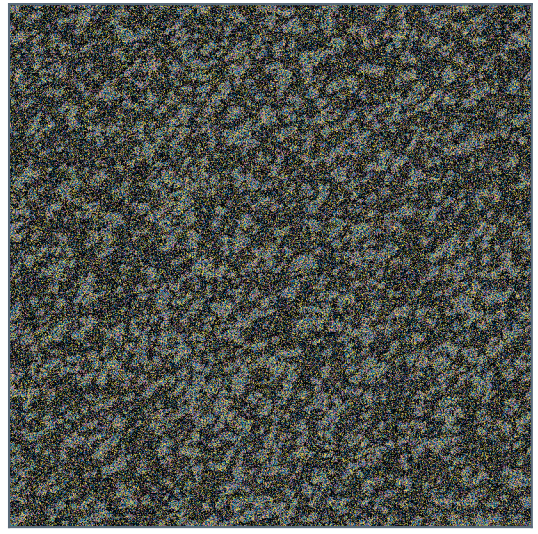

State-matched branch point
+0
phase 204,800 · M=369,139

untouched
+32,768
phase 237,568 · M=389,008

global shuffle
+18,432 (req. 32,768)
phase 223,232 · M=501,581

empty positive negative bound-neutral

at this size the occupied states blend to grey; black is empty
