Microscopic disorder can coexist with macroscopic order

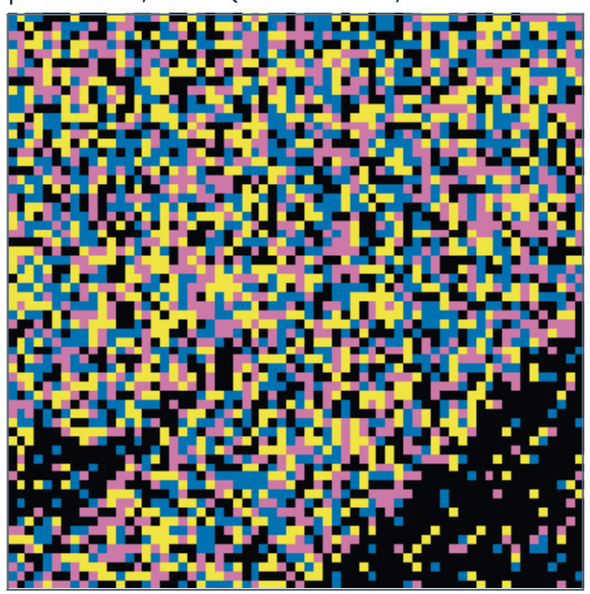

Full 1024×1024 world
phase 311,296 · Q=0 · M=431,677

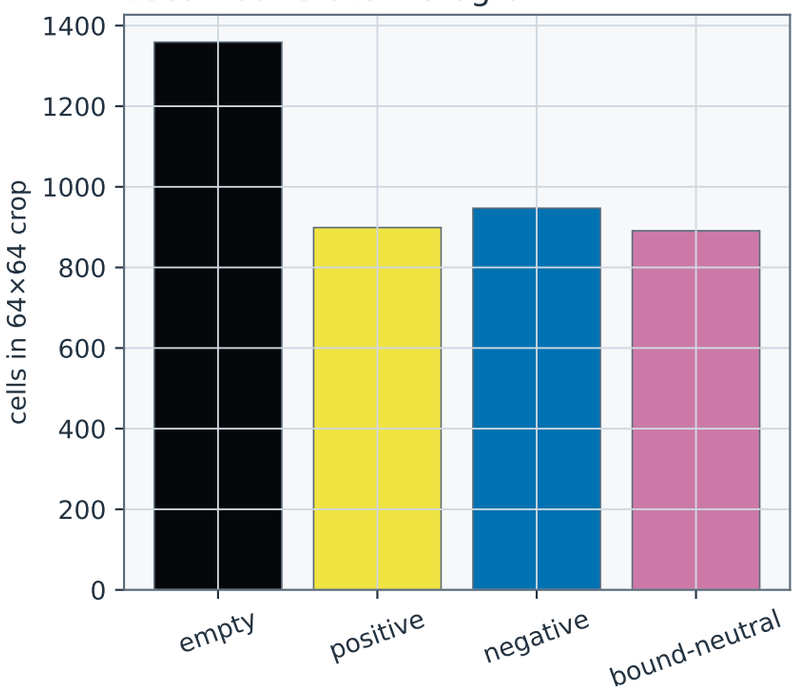

256×256 crop · (512,256)
phase 311,296 · Q=0 · M=431,677

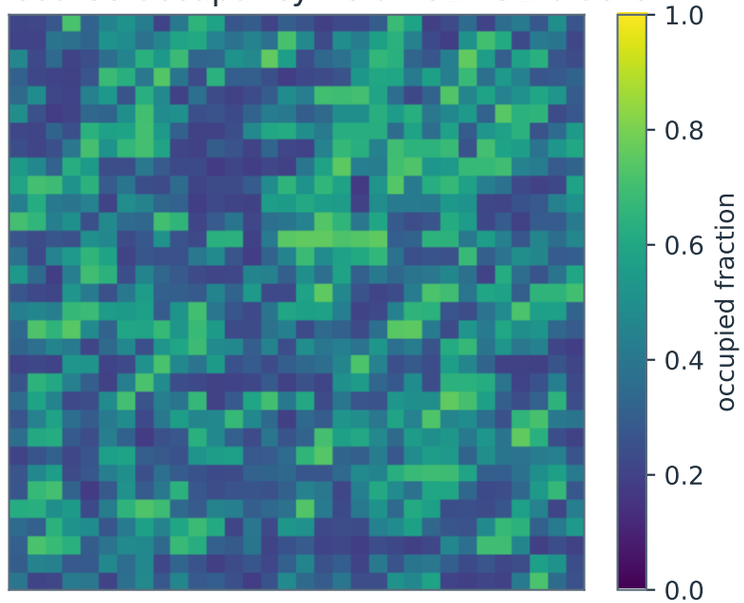

64×64 crop · (512,384)
phase 311,296 · Q=0 · M=431,677

Local four-state histogram

Coarse occupancy field · 32×32 blocks

empty positive negative bound-neutral

Normalised local entropy
0.988 / 1.000

Large-scale domains are visible without a simple microscopic checkerboard, stripe, or crystal.

This panel describes morphology; it does not claim equilibrium or a universal phase transition.
